

PHILLIPS RIVER HIKING TOUR

EXPLORE A WILDERNESS WONDERLAND...

Where the Phillips River meets the ocean, the emerald rainforest towers above clear waters that teem with salmon. The Phillips River Estuary is a rare habitat where lake, river, and ocean merge to form a splendid haven for wildlife.

Walk among the red and yellow cedar and the western hemlock; they are the homes of bald eagles, owls and other birds. Take in the salmon-rich waters from specially-built bear viewing platforms. During the summer, grizzlies and black bears feed on the salmon and splash in the crystal waters. Glimpse a magnificent elk or deer; these spectacular animals flourish in the serene rainforest.

The Phillips River Estuary is in the heart of traditional Kwiakah First Nation land. Sonora Resort in Partnership with the Kwiakah First Nation will introduce you to the history, diversity and wonder of the Phillips River.
